Change Management & Readiness

Release and change management professional with approximately 20 years of IT experience spanning enterprise systems analysis, healthcare application delivery, business requirements, release governance, risk assessment, quality validation. Skilled in evaluating business and system requirements, cross-functional coordination. Experience supporting complex clinical platforms, operational readiness, and regulated enterprise changes.

WORK EXPERIENCE

Cognizant Technology Solutions • 01/2026 – Present

Manager – Projects | Client: CVS Health | Role: Release / Change Manager

- Manage end-to-end release and change processes in accordance with organizational and regulatory requirements.
- Coordinate release planning, schedules, dependencies, and implementation readiness across multiple applications and environments.
- Maintain release governance documentation, audit records, change notifications, and implementation procedures.
- Coordinate version tracking and rollback readiness for application and AI/ML model changes.
- Collaborate with business, application, quality assurance, and operations stakeholders to confirm release scope and dependencies.
- Assess release risks, implementation impacts, and operational readiness; facilitate milestone and Go/No-Go reviews.
- Coordinate release validation, recovery planning, and business continuity preparations.
- Assess release-management processes and coordinate improvements to established CI/CD release workflows (Azure DevOps, Jenkins, GitHub).
- Provide stakeholder communications, management dashboards, risk reporting, and team guidance.

Business Analyst – Manager, Projects

- Conducted end-to-end business and systems analysis to evaluate clinical workflows, identify functional gaps, and improve enterprise application efficiency.
- Analyzed healthcare information systems and operational processes to support regulatory requirements and identify opportunities to reduce administrative burden.
- Gathered and translated business and regulatory requirements into functional specifications, user stories, data mappings, and end-to-end workflow diagrams.
- Collaborated with solution architects and application teams to evaluate Care Management (CM) and Utilization Management (UM) system requirements and proposed solutions.
- Served as a functional subject matter expert for utilization management, supporting requirements clarification, system impact analysis, and operational alignment.
- Conducted gap and impact assessments to evaluate existing system capabilities against evolving business, regulatory, and operational requirements.
- Prepared operational reports and dashboards to monitor performance metrics and support stakeholder decision-making.

SKILLS

Release governance, change control, implementation readiness, business impact assessment, system analysis, gap analysis, requirements documentation, stakeholder coordination, risk management, project delivery, Agile/SAFe, audit documentation.

Tools: Rally, Jira, Confluence, ServiceNow, Azure DevOps, Jenkins, GitHub, Service Now, Dynatrace, IBM Rational Quality Manager, Oracle, DB2, Postman, SoapUI, Swagger, MS Office.

EDUCATION

Post Graduate Diploma in Information Technology

Symbiosis University • 07/2010

Bachelor of Science

Madras University • 06/2006

CERTIFICATIONS

Google Generative AI Leader • 02/2026

AWS Cloud Practitioner • 02/2021

SAFe Scrum Master • 01/2021

SAFe Agilist • 12/2020

SAFe Product Owner / Product Manager • 05/2020

AHM540 Medical Management • 05/2020

AHM250 Healthcare Management • 08/2011

Professional, Academy for Healthcare Management • 08/2011

ISTQB Certified Tester • 05/2008

IBM Rational Functional Tester for Java • 12/2007

IBM Rational Test Manager •

Test Architect – Senior Associate, Projects 12/2007

- Managed a healthcare quality assurance team of more than 15 team members, including resource plans and performance feedback.
- Established testing procedures and prepared validation plans, work breakdown structures, and schedules for migration and modernization programs.
- Reported project status and risks to senior management.
- Participated in system verification, validation, and commercial release readiness for care management, utilization management, and claims platforms.
- Served as liaison between business stakeholders and IT teams to resolve implementation issues.

Test Lead – Associate, Projects

- Gathered and analyzed business requirements and translated them into functional specifications using system impact and gap analysis.
- Prepared use cases, process flows, and business validation scenarios; facilitated stakeholder walkthroughs and system demonstrations.
- Assessed scope changes and schedule impacts for compliance-driven initiatives.
- Monitored application deployment activities using IBM UrbanCode Deploy and Jenkins workflows.
- Assessed regression validation needs and performed automated testing, including test-script maintenance and execution issue resolution.
- Prepared and reviewed system, regression, and end-to-end test plans and scripts.
- Performed system and integration testing of healthcare COTS applications, including interface validation with SoapUI, Swagger, and Postman.
- Validated mobile applications across iOS, Android, and BlackBerry using Charles Web Proxy.
- Assessed test automation suitability using QTP, IBM RFT, BlazeMeter, and Selenium.

PROJECTS

Clinical Program • CVS Health • 06/2016 – Present

Enterprise clinical platform initiative supporting standardization, utilization management transformation, reduced administrative burden, and improved operating efficiency.

My Account (Mobile) • Comcast • 01/2016 – 05/2016

Self-service platform for billing, outages, appointments, troubleshooting, and device management across web, mobile, and set-top boxes.

Next Gen Program • Aetna • 05/2015 – 12/2015

Modernization initiative transitioning internally maintained applications to commercial off-the-shelf software supporting individual and Medicare markets.

Claims Adjudication Engine • Aetna • 09/2009 – 04/2015

Claims processing platform based on ERISCO architecture, integrated with finance, payment processing, and correspondence systems.

Channel Management • Aetna • 09/2006 – 08/2009

Secure member-facing platform for personalized health, financial, plan, benefit, and product information through Aetna Navigator.
